1. INTRODUCTION

At Dahlberg S.A we wish that your stay onboard is special, that you can prepare and enjoy your meals in good company without problems or stress, turn the catch of the day into a delicious seafood dinner and enjoy it with your guests in the cockpit.

Therefore, as official distributors of DOMETIC, we have prepared this guide to help you find out what you need in order to make the most of your galley onboard.

DOMETIC has an extensive selection of equipment for a well-functioning galley: a wide range of hobs, ovens, gas- and alcohol cookers, as well as a collection of sinks, some of them with heat-resistant glass lids in space savings hob/sink combinations.

Not to mention such practical accessories as electric water kettle or coffee machine!

Our mission is to make cooking, grilling and washing up easy for you.

2. HOBS / COOKTOPS

a) Integrated hobs with a glass lid

The compact HBG hobs of DOMETIC let you cook in the confined spaces of your boat. They are fitted flush with the work top, and the knobs are ergonomically placed for convenient cooking control. When you have finished cooking and cleared the hob, you can close the glass lid to gain additional work space and protect your hob at the same time.

You can find cooktops of different sizes with two or three gas burners. The whole of this range comes with a safety ignition system and a heat resistant security glass lid which provides more working space when closed.

b) Hob/sink combinations

The space saving hob/sink combinations of the HSG series are available with or without a heat resistant glass lid (which can be closed to provide additional working space). Made from sturdy stainless steel, they are easy to clean, safe to use and available in various compact designs.

The hob/sink combinations come supplied with siphon and rubber seal, taps are available separately.

The HS series includes models with two or three burners, with the sink positioned to the left or right of the hob.

c) Integrated compact hobs

The hobs in the HB series have an ergonomic heat control with easy-to-check control knobs and detachable grids for easy cleaning. They are remarkably compact and safe to use with DOMETIC's well proven safety ignition system.

Depending on the space available, you can choose a hob of either one, two or three burners.

3. OVENS AND COOKER RANGES

The DOMETIC range offers both electric and gas ovens. For confined spaces, slimline models are available. All the ovens have thermostatic temperature control and glass doors hinged at the bottom for easy access.

The cooker ranges are available either with two or four burners.

If you prefer a more complete equipment, you can choose an oven with a built-in grill inside and a hob on top.

4. EXTRACTOR HOODS

a) Extractor hoods

DOMETIC cooker hoods quickly draw cooking fumes, odours and moisture out of the boat and come with integrated lights, easy controls and washable grease filters.

The extractor hoods are very energy efficient providing excellent air circulation. To simplify the installation, they have either lateral or roof dome ventilation available.

b) Roof ventilators

These roof ventilators effectively remove unwanted odours and fumes from your boat. You can choose a powerful motorized model, or a soundless one for your sleeping area. All ventilators are easy to install, and durable too with their robust plastic dome.

Another product to bear in mind is the activated carbon filter for use in DOMETIC cooker hoods. It removes odours for fresher smelling air in your boat.

5. SINKS

According to your needs, you can choose between round and square models, and with or without a glass lid (that can be folded down after the washing up and used as an additional working surface).

a) Sinks and drainers

SNG series sinks and sink/drainer combinations are practical to use, easy to clean and a pleasure to look at. All products in this product family come with a beautiful, heat/resistant glass lid.

By folding the lid down, you can gain more working space in the galley. If you would prefer a combination of hob and sink, please go to [point 2.](#)

b) Square and round sinks

These will make your galley just perfect – the sink fittings are easy to use and sturdy enough to withstand wear.

6. MICROWAVE OVENS

The DOMETIC microwave ovens come with a tactile easy-to-read-and-use control panel of the latest generation. A selection of spare parts is also available, including rotating glass plates and wheels to go under the plates, to help you to keep your microwave oven in good working order.

The MVO 24 microwave oven is equipped with three cooking and one defrosting functions. It is easy to use and to clean, as it has an integrated ceramic plate instead of the more habitual rotating plate.

7. ELECTRIC KETTLES AND COFFEE MACHINES

We have a selection of water kettles designed to run off a 12 or 24 V power source and suited for space-saving table or wall installation. They have a robust relay technology and are also equipped with automatic switch-off when boiling temperature is reached, boil dry protection and a status indicator.

The compact coffee machines come with boil dry protection, permanent filter for convenience and a fixing kit for mounting on the worktop.

Some other models have a swing filter for easy operation, integrated transport securing device for the glass pot, fixing kit for wall or desk mounting and a warming plate with thermostat.

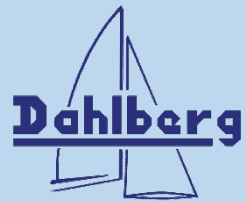

8. ACCESORIES

In a great galley nothing is left to chance. That's why we have a wide range of accessories available, from high quality cleaning products to gascheckers, crystal tops, waste baskets, siphons with straight or angled waste fittings, vacuum sealers, bags and more.

Complete the look of your stainless steel sink with taps and siphons to match. We have a wide range from high-quality brass taps to lightweight plastic models, all with sparkling chrome finish. Plus, easy-to-fit siphons for every imaginable plumbing layout – with straight, angled or double waste fittings
