MULTIFUNCTION SMART TAPS - BOILING, CHILLED, SPARKLING,
HOT & COLD FILTERED WATER - IN AN INSTANT

QUATREAU COLLECTION

quatreau®
Collection

Design innovation – designed and manufactured in the UK

Quatreau® combines function, design, and quality for the ultimate multifunction and smart taps. Manufactured in Great Britain from solid 316 stainless steel for durability and minimal environmental impact, Quatreau is the most energy-efficient Collection of multifunction taps available.

Options & Finishes – Available in brushed or polished solid stainless steel. **Our design team can also accommodate bespoke finishes.**

quatreau®
Touch

One tap, five functions – the only touchscreen tap of its kind.

Quatreau Touch™ is the most stylish and technologically advanced multifunction tap on the market. Its touchscreen control panel dispenses boiling, chilled, sparkling, hot and cold filtered water as standard, with several built-in safety features and thermostatically controlled temperatures.

The complete kitchen tap, Quatreau Touch™ assists with food and drinks preparation, hand and dishwashing and eliminates the kettle and plastic bottled water.

quatreau®
SmartTap

The stand-alone drinks station – ideal for drink or food prep areas.

The Quatreau SmartTap™ compact counter-top system with an illuminated button console dispenses a choice of boiling, chilled, and sparkling water.

Designed to withstand high-use areas demands, it is the most robust and reliable system on the market, with the lowest energy consumption and highest performing insulation. Easy to use and available with an optional drip tray for a built-in drink station.

INSTANT BOILING

Providing instant boiling water on demand eliminates the need for kettles and associated time staff can take preparing hot beverages.

A Quatreau Touch™ or SmartTap™ provides a safer method of dispensing boiling water and an altogether more efficient use of energy by maintaining temperature and delivering only what is required.

Dispensing high volumes of piping hot water, the Quatreau Touch and Quatreau SmartTap meet the needs and requirements of busy offices and homes.

Everyday uses

Tea • Coffee • Blanching •
Sterilising • Pre-heating •
Poaching • Steaming • Vegetable
preparation

Safe handling

Quatreau Touch boiling safety
function requires a three step
touch sequence to activate. Auto
cut-off after 60 seconds. Outer
hoop of the tap remains cool to
touch to prevent scalding.

The perfect temperature

Tea and coffee are best prepared
using water that's just come off
the boil. Quatreau® taps deliver
at the ideal temperature of
approximately 204°F thereby
avoiding the spitting and
spluttering associated with higher
temperatures.

INSTANT CHILLED

Nothing is more refreshing than beautifully chilled filtered water in the workplace. It is common knowledge that dehydration leads to headaches and lethargy so making chilled water available to your staff not only improves welfare but is likely to enhance performance.

For meetings, why not serve in a glass jug with slices of citrus fruit and mint for the ideal accompaniment to your work environment. Alternatively we can supply branded bottles that can be refilled time and again thereby reducing your company's carbon footprint whilst eliminating the need to stock bottled water for meeting rooms.

INSTANT SPARKLING

Never has sparkling water tasted so good. Encourage your staff to drink more water throughout the day with the sparkling option.

Refill branded bottles for your meeting rooms to reduce waste and carbon footprint.

HOT & COLD WATER

Quatreau Touch™ saves water by dispensing mains tap water at the perfect pre-set temperature for rinsing and washing. Simply touch the lower left quadrant once. The temperature is thermostatically pre-set to 104°F and delivered in a controlled stream to prevent splashing. This eliminates the need to waste water adjusting the temperature by mixing hot and cold. A great way of saving both time and water.

For cold tap water double touch the same icon. A great addition to corporate kitchens and breakout areas.

DESIGN INNOVATION

STYLE

The Quatreau® collection brings style, substance, and unbeatable technology to your business. The innovative touchscreen control panel of QUatreauTouch™ will be the talking point of your kitchen and QuatreauSmartTap™ with LED-lit buttons and an optional recessed drip tray brings compact convenience to any environment. The high-quality materials and sleek design lend themselves to any interior decor available in either brushed or polished stainless steel finishes.

Kitchen, hospitality, and breakout areas are streamlined with Quatreau®, eliminating the need for a kettle and saving valuable countertop space. You can also forget about bottled water deliveries for reduced clutter and maximized convenience.

FUNCTION

Quatreau® is the culmination of over a decade's continuous research and development. With a choice of water options including Boiling, Chilled, Sparkling, and Ambient (with thermostatically controlled hand-Hot and Cold on QuatreauTouch™), your environment boasts the latest technology in any kitchen, restaurant, office, or hospitality area including breakout areas, lounges, waiting rooms, and receptions.

Quatreau® taps are made entirely in Great Britain for exceptional build quality and reduced environmental impact. We use only the best, WRAS approved, materials including 316 stainless steel, for durability and longevity and ultra-reliability. Either the Quatreau Touch™ or Quatreau SmartTap™ components fit into a 24-inch cabinet and come with a ventilation kit supplied as standard with all chiller units.

SUSTAINABILITY

Cut your environmental impact with Quatreau®. Chilled and Sparkling water on tap means you'll never need to arrange plastic or glass bottled water deliveries again, so that's reduced carbon footprint, zero food miles, and no plastics waste.

Quatreau® tap systems are the most energy and water-efficient on the market, further saving environmental resources.

Quatreau is the only brand to have a certified 95% reduction in carbon footprint versus bottled water. Quatreau SmartTap™ is 33% more energy efficient than a kettle, so you're winning on every front.
